Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 57-61, 80 drawn to rake having grip handles & upper ends of the handles two connecting means, as shown in figures 1-2, classified in class 56, subclass 400.04. It is noted that claim 61, cannot be included with claim 57, since claim 57 teaches away from the embodiment claim 61 (dependent of claim 57) appears to recite. Also, it is noted that claim 80, cannot be included with claim 57, because claim 80 describe an embodiment shown in fig 10A, which is inconsistent with the embodiment presented in claim 57.
 - II. Claims 81-87, drawn to embodiment figures 3-5, classified in class 56, subclass 400.19.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as a rake which does not need coupling together in raking position at and not being held by handle grips, and furthermore, Group II contains specifics of a connecting means which are not required of Group I. Because, in Group I, the second connecting means is for "flexibly and pivotally holding"; while, in Group II,

Art Unit: 3671

the connecting means are a chain, cord, ring, etc... Therefore, Group I can operate with the connecting means shown in the embodiment presented in figs 1-2, and Group II is utilizing specifics which are different, as shown in figures 3-5. See MPEP § 806.05(d).

By original presentation claims 78-79, 88-105 are not considered since they appear to introduce new embodiments as discovered during the interview with the Applicant.
